

lecture by

Prof. Dietmar Eberle on Sustainable Building Design - Principles and Tools

A public lecture for architects, engineers, investors and users of buildings by the award-winning Austrian architect on contemporary approaches for the creation of sustainable architectural spaces. The lecture introduces needs, tools and contemporary solutions.

date/time: Monday, June 15th '09, 17 o'clock

location: København, Holmen, filmskolens biograf (next to KARCH)
free entry, the lecture is in English.

The lecture is organized by 'Center for IT and Arkitektur (CITA)', 'Institute for Design and Kommunikation' and 'Institute of Architectural Technology' at 'Kunstakademiets Arkitektskole' in context with the student competition 'Sustainable Living'.

The competition is initiated by 'Institute of Architectural Technology' and 'Institute of Planning' and supported by: Margot og Thorvald Dreyers Fond, Aase og Ejnar Danielsens Fond as well as Kunstakademiets Arkitektskole.
